Web Development

PROPOSAL VERSION | 14092024.rev01

Project Forward

Starting: Project Forward This is a test response to simulate OpenAI's streaming output. Here's some content to fill space, ensuring we reach the required word count. This text is designed to mimic streaming data from an AI model, providing developers with a realistic simulation for testing purposes. It includes various sentences to pad the length to at least 100 words, which is important for ensuring functionality across larger responses. Continuous text helps in evaluating performance and handling long inputs or output

Project Backbrief

Starting: Project Backbrief This is a test response to simulate OpenAI's streaming output. Here's some content to fill space, ensuring we reach the required word count. This text is designed to mimic streaming data from an AI model, providing developers with a realistic simulation for testing purposes. It includes various sentences to pad the length to at least 100 words, which is important for ensuring functionality across larger responses. Continuous text helps in evaluating performance and handling long inputs or output

Understanding

Starting: Understanding This is a test response to simulate OpenAI's streaming output. Here's some content to fill space, ensuring we reach the required word count. This text is designed to mimic streaming data from an AI model, providing developers with a realistic simulation for testing purposes. It includes various sentences to pad the length to at least 100 words, which is important for ensuring functionality across larger responses. Continuous text helps in evaluating performance and handling long inputs or output

Proposed Solution

Starting: Proposed Solution This is a test response to simulate OpenAI's streaming output. Here's some content to fill space, ensuring we reach the required word count. This text is designed to mimic streaming data from an AI model, providing developers with a realistic simulation for testing purposes. It includes various sentences to pad the length to at least 100 words, which is important for ensuring functionality across larger responses. Continuous text helps in evaluating performance and handling long inputs or output

Costs And Schedule

Starting: Costs and Schedule This is a test response to simulate OpenAI's streaming output. Here's some content to fill space, ensuring we reach the required word count. This text is designed to mimic streaming data from an AI model, providing developers with a realistic simulation for testing purposes. It includes various sentences to pad the length to at least 100 words, which is important for ensuring functionality across larger responses. Continuous text helps in evaluating performance and handling long inputs or output

About Us.

About us.

We develop quality custom website solutions that provide our clients with a distinct competitive advantage. Our business clients want results. Their customers expect a seamless user experience. Our unique technology solutions deliver both - elegant user experiences, deeply grounded in business outcomes.

We help businesses

- ✔ **Design and develop professional, high performing websites.** Our web designs are custom made by an outcome-centric team of designers and developers, giving you an elegant & effective website that drives traffic and generates more leads.

- ✔ **Improve load times and obtain better search rankings.** With a custom built, search engine optimised website hosted by us you get speed, reliability and performance that your customers and Google will love, resulting in higher rankings & more conversions.

- ✔ **Streamline business processes.** Our highly scalable, innovative and trustworthy web portal solutions will help streamline your business processes, simplify and improve workflows and allow you and your staff time to focus on more valuable business areas.

WE'RE CONSTANTLY FINDING WAYS TO IMPROVE

Technology doesn't wait for anyone, so at Greenhat we're continuously improving our services and technological capabilities and are always on the look out for whats new on the web horizon to ensure we're creating effective solutions for your business

WE'RE BROAD THINKERS

We are just as technical as we are creative and we're not afraid to collaborate, infact we thrive on it. We listen to our clients, I mean really listen, so that we can uncover deeper insights about your company and its requirements and develop the web solution you are looking for.

WE ARE IN IT FOR THE LONG HAUL

We like to foster long term relationships with our clients, partners and suppliers. Many of our clients trust our product and service delivery so much, that they have been using our services for well over 10 years.

WE ARE LOCAL

All Greenhat websites are custom-designed originals. We don't deal in mass-produced web templates and we never offshore our web development. All website design and development is done right here at our Brisbane office.

Our clients include:

What our clients say.

‘'We have engaged Greenhat as our sole development agency for the past 20 years. We couldn't be happier with their service and the partnership we have created. They are at the forefront of their game and are continuously coming up with innovative ideas to suit our brand and industry. Thanks team Greenhat!''

Sandra Poletto, CEO

‘'Greenhat have been our design & web development company for over 10 years, consistently delivering functional, aesthetically-pleasing websites, services and tools. Their team is friendly, responsive, and always going the extra mile to help us achieve our goals. I would not hesitate to recommend Greenhat to any business looking to develop a top website - especially if you're using e-commerce and have a thing for beautiful design.''

Pedro Gondim - Mental Health Academy

‘'The team at Greenhat Web Design created 2 websites for me; one under considerable time constraints. Not only did they meet the deadlines but they produced professional and effective websites. Greenhat also hosts our sites and have always assisted with minor modifications and updates to keep the content relevant and SEO optimized. We highly recommend their services.''

Lachlan McKirdy - LCM Air Conditioning

‘'We have been dealing with Anthony and the team at Greenhat for over 10 years. In that time I can't speak highly enough of their developers and graphics team who have supported myself and my team here at Whereabout Supply. I'm always highly impressed by their efficient services and creative ability. They have a number of support staff and have always responded to me swiftly even at times outside normal business hours. I would highly recommend using Greenhat for any IT and creative projects, as they are exceptional professionals at what they do.''

Adam Cameron - Whereabout Supply
